

# XAVAC® / SAVAC® / Civac® SMA $50\Omega$ , 18 GHz

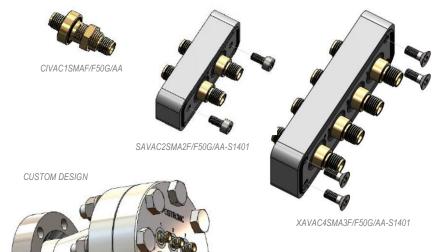

SMA, SubMiniature version A (sometimes called OSM), are  $50\Omega$  connectors with small size, 1/4"-36 threaded coupling and high mechanical durability. They are one of the most commonly used RF / Microwaves connectors types used for bandwidth up to 18GHz.

Positronic hermetic SMA consists of different variant of Female/Female feedthroughs on an aluminum rectangular shell like XAVAC or SAVAC, especially for SPACE and INDUSTRIAL vacuum applications. Quantity of coaxial contacts adapters depends on the size of the connector, from single one on a Size 1 to four units on the sizes 4 to 6 of XAVAC/SAVAC

All Positronic hermetic SMA connectors are 100% leak tested after manufacturing and used only precision machined contacts for strength and durability.

Hermetic SMA interface mating is according to MIL-C-39012 and IEC 60169-15.

- Available in 18 XAVACs configurations, 18 SAVACs configurations and one CIVAC circular configuration.
- Mountable in standard panel cutout
- Specific mounting (ISO, JIS flanges,...) on request.

#### **TECHNICAL CHARACTERISTICS**

#### **MATERIALS AND FINISHES:**

**Center Contact:** 

Housing: Aluminum alloy, golden iridescent

conversion coating RoHS.

**Dielectric Material:** PTFE and Epoxy Resin

**Outer Contact:** Brass, 0.000025 inch [0,64 microns]

min. gold over copper plate. Copper alloy, 0.000050 inch

microns] min. pure gold over copper plate.

Fluorocarbon.

O-Ring:

One mounting and one spare part.

**Fixations Screws:** Stainless Steel (Kitted).

#### **MECHANICAL CHARACTERISTICS:**

0.9Nm [8 IN-LBS] **Coupling Torque:** 

(coupled with Male SMA connector)

**Mechanical Operations:** 500 operations per IEC1169-1 §9.2.3

# **CLIMATIC CHARACTERISTICS:**

Temperature Range: -40°C to + 80°C Helium Leak Rate At Ambient Temperature: < 5.10-9 mbar.L/s under a vacuum of 1,5.10-2 mbar

#### **Resin Outgassing Properties:**

< 1.0% TML (Total Mass Loss): **CVCM** (Collected Volatile Condensable Materials): < 0.1%

#### **ELECTRICAL CHARACTERISTICS:**

 $\leq$  3,0m $\Omega$  Initial Center contact resistance: Outer Conductor Continuity:  $\leq 5.0 \text{m}\Omega$  Initial

1000V RMS per IEC1169-1 §9.2.5 Proof Voltage at Sea Level:

**Nominal Impedance:** 50Ω 0 to 18 GHz Frequency Range:

Insulation Resistance: 5GΩ Min. at 500V DC

between center contact and outer

contact.

Only with special option S14011):

5GΩ Min. at 500V DC

between outer contact and aluminum

housing.

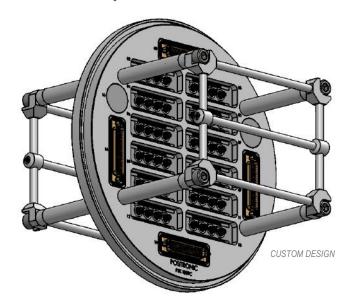

#### Signal Integrity:

	Frequency Range	Insertion Loss Max. (Db)	Return Loss Max. (Db)	VSWR <sup>2)</sup> Max.
	1kHz to 5GHz	-0,21dB	-20,10dB	1,22
I	5 to 10GHz	-0,35dB	-17,55dB	1,31
ĺ	10 to 15GHz	-0,58dB	-13.92dB	1,50
	15 to 18GHz	-1,25dB	-8.88dB	2,12

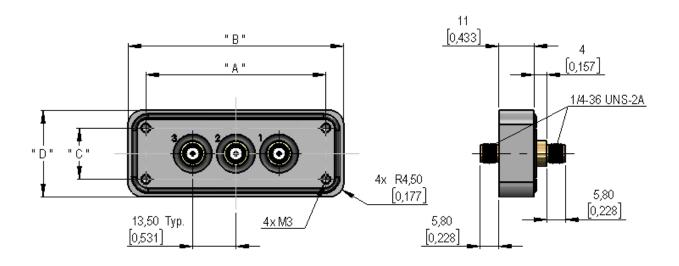

<sup>2)</sup> Voltage Standing Wave Ratio

#### Connectors are RoHS compliant per the current directive.

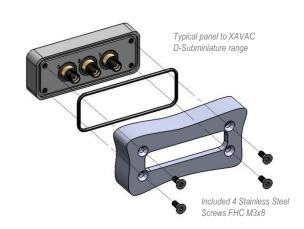

1) S1401: Dielectric insulator between outer shell and aluminum housing
